Telonics Collar Release Programmer - USB Device Software and Driver Installation

The setup program for the Telonics Collar Release Programmer (BCP-2) installs device software for the Telonics TSC-4A USB Interface Cable. You may see one or more of the following messages during the installation of the Collar Release Programmer:

Windows Vista and *Windows 7* users:

Click the **Install** button if you see the following message. If you do not choose this option during installation (you instead click Don't Install), you will have to reinstall the Collar Release Programmer to install the USB device software. You can optionally check the box that says "Always trust software from Telonics, Inc." to avoid this message in the future.
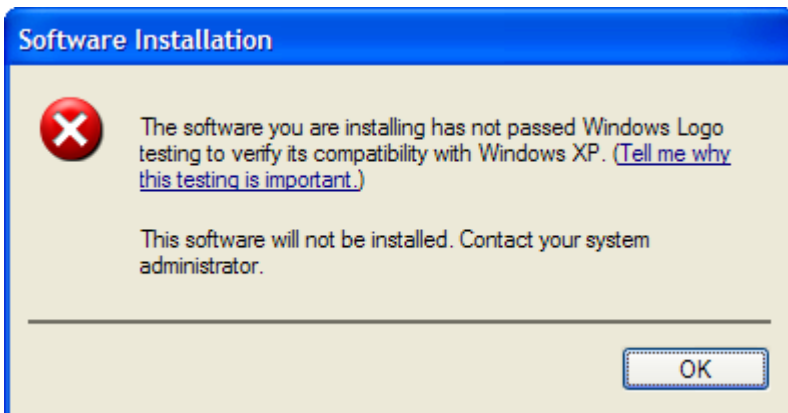

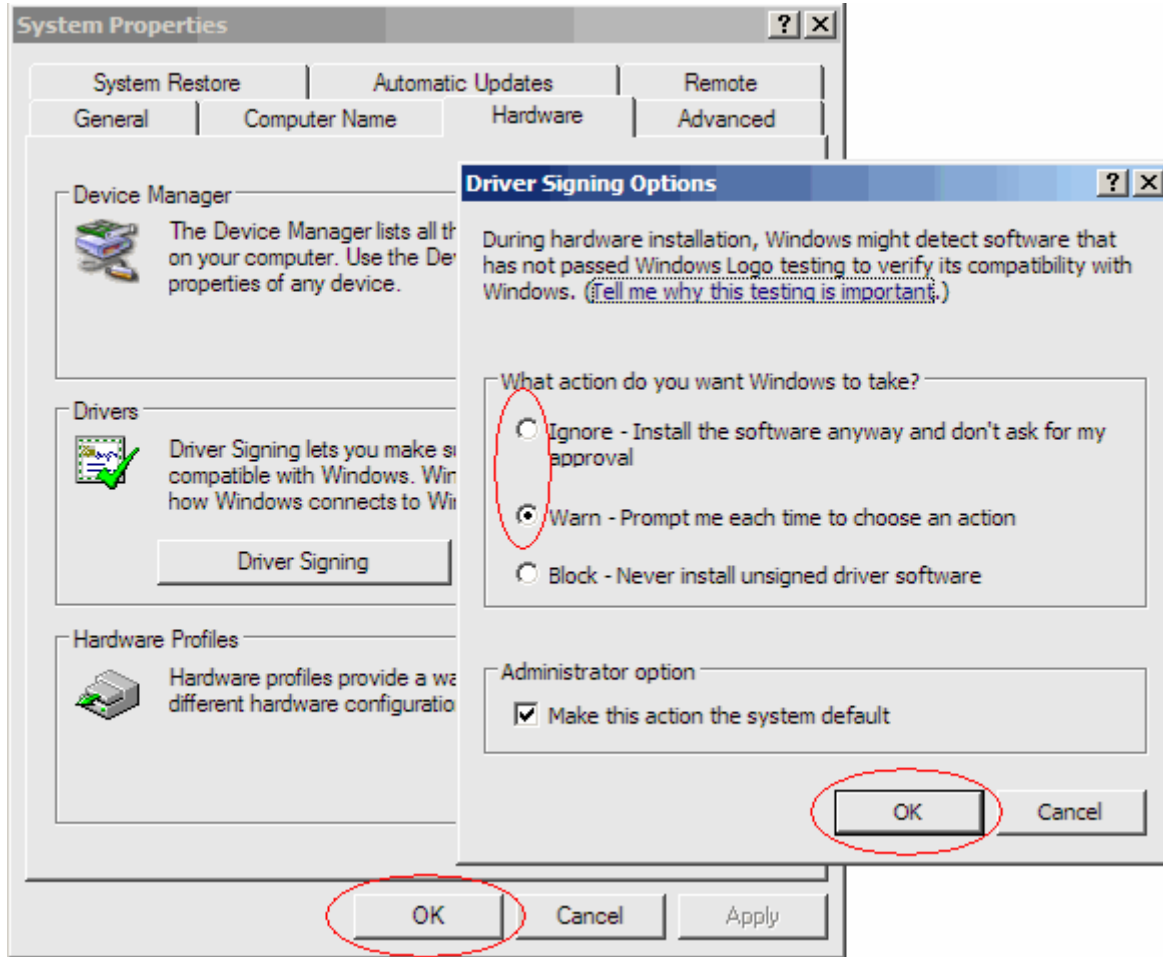

Windows XP *users:*

Click the **Continue Anyway** button if you see the following message. If you do not choose this option during installation (you instead click STOP Installation), you will have to reinstall the Collar Release Programmer to install the USB device software.

Software Installation

⚠ The software you are installing has not passed Windows Logo testing to verify its compatibility with Windows XP. (Tell me why this testing is important.)

Continuing your installation of this software may impair or destabilize the correct operation of your system either immediately or in the future. Microsoft strongly recommends that you stop this installation now and contact the software vendor for software that has passed Windows Logo testing.

[Continue Anyway]   [STOP Installation]

If you see the following message during installation, you will need to modify your **Driver Signing** settings in Windows XP and then reinstall the Collar Release Programmer.

Software Installation

❌ The software you are installing has not passed Windows Logo testing to verify its compatibility with Windows XP. (Tell me why this testing is important.)

This software will not be installed. Contact your system administrator.

[OK]

Right-click on the **My Computer** icon in the Start Menu or on the desktop and choose **Properties**. Go to the **Hardware** tab and click **Driver Signing**. Change the setting to **Ignore** or **Warn**. Click **OK** to close the **Driver Signing Options** window. Click **OK** to close **System Properties**.

**Connecting TSC-4A to your PC (following installation of the Collar Release Programmer)**

Windows 2000, Windows Vista, or *Windows 7 users:*

The USB device driver will be installed automatically when you plug in your TSC-4A. No user intervention is required. The Notification Area indicates installation progress and results:
Installing the device driver:

If you see the following message, the TSC-4A device driver installed successfully:

If you see the following message, the TSC-4A device driver installation failed and you must reinstall the Collar Release Programmer:

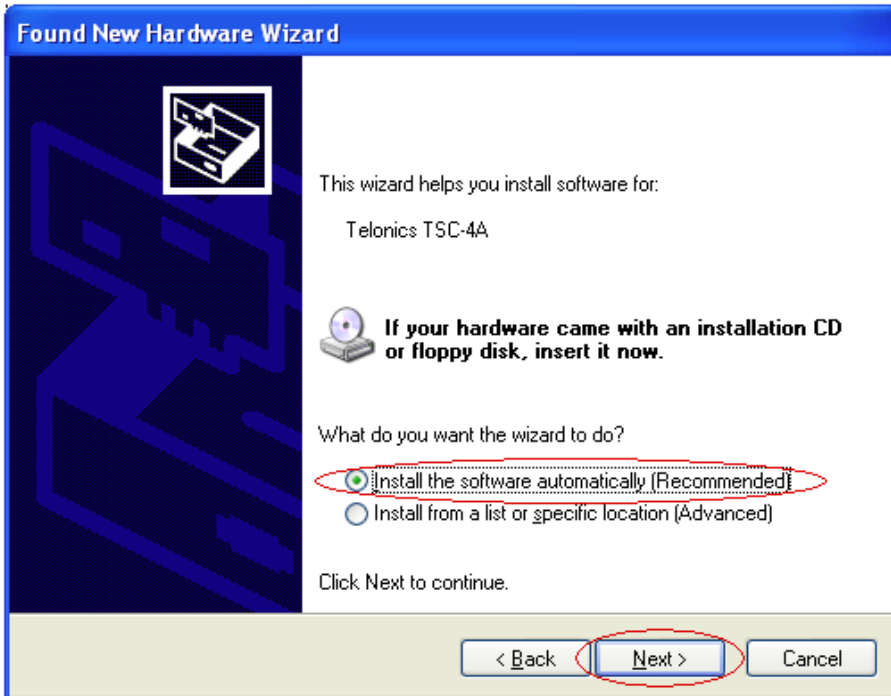

Windows XP users:

The Found New Hardware Wizard will display the first time you plug in your TSC-4A. The wizard will display several pages requesting information:

When you see the following page, click the **No, not this time** option button and then click the **Next** button. For some users, the hardware wizard will skip this page.
When you see the following page, click the **Install the software automatically (Recommended)** option button and then click the **Next** button.

If the Windows XP **Driver Signing Options** are set to **Warn**, then you will see the following message. Click the **Continue Anyway** button.

If you see the following page, you have successfully installed the driver for the TSC-4A. Click the **Finish** button.

If you see the following page, the driver installation failed and you must reinstall the Collar Release Programmer:
